## WORK EXPERIENCE

---

Founder & Engineer at Kiwi News 2023-02–Present

- Built Kiwi News (React web & iOS), growing it to 3k MAU, keeping it up 24/7/365.
- Shipped credible neutral protocol with Solidity and libp2p.
- Ran regular user interviews and shipped iterative UX improvements that increased DAU/MAU to 15%

Founder at Rug Pull Index 2021-11–2022-11

- Shipped Rug Pull Index, a platform analyzing onchain market health for traders.
- Created a daily risk score for tradable assets by analyzing AMM pool mechanics.
- Secured over \$100k in grants from OceanDAO to fund development.

Self-employed 2018-09–2021-05

- Wrote 20+ web3 blog posts with a readership of over 100k.
- Built the onchain voting system for Hito Steyerl's StrikeDAO art event.

SE & Product Manager at BigchainDB GmbH 2015-05–2018-01

- Built the front-end for ascribe.io, a pioneering onchain digital art platform.
- Designed core protocols for onchain IP licensing and Byzantine Fault Tolerant consensus.
