Sept, 2018 - May, 2019

8 Months

Aptech Learning • New Delhi

- Trained 300+ students on Web, Java, and Android development.
- Organized workshops on ethical hacking and software security.
- Guided student groups to build projects like Contact Directory (Android & C++), Attendance Management (PHP, MS Excel), and Scientific Calculator (Java).

Featured Projects

Params Editor

"Smart URL parameter editor for Chromium browsers"

The smartest way to edit URL parameters in Chrome. Automatically detects parameter types and provides the perfect input for each one. Features smart parameter detection, number fields with validation, date pickers, boolean toggles, list editors, and a built-in JSON editor with syntax highlighting.

BillsSplit

"Split bills with colleagues effortlessly on Slack!"

BillsSplit makes your life easier by splitting bills, tracking them and getting back the balances, all in Slack.

Transactions List Lite

"Money Manager"

Transactions List Lite is designed to help businesses keep a private record of all your transactions in one place. Now create different accounts and save all their transactions in the easiest and safest way possible.

SGHL

IsolPro

"E-commerce"

Global e-commerce website for Shree Ghanshyam Hardware Limited with sections like Auction and Toolbox builder.

Price List Lite

"Inventory Manager"

Price List Lite is designed for small businessmen to help them create and store a price list of different products they deal with. Create Your Own Price List App builder available on the website.
